1 QualityRelease 5063.001 | User

1.1 QualityRelease 5063.001 | Introduction

Dear SwissSalary Customers,
Dear SwissSalary Partners,

This QualityRelease contains adjustments and corrections for customers already using SwissSalary version 5063.000.

One task was implemented as 5061.201 and is available for the corresponding versions.

For more information on the contents of versions 5063.000 or 5061.200, please refer to the corresponding manuals.

Customers are responsible for implementing SwissSalary updates. Our Support or Your Dynamics365 partner can provide help if needed. With SwissSalary365 (Cloud), customers are also responsible for this and SwissSalary does not carry out any updates automatically.

Your SwissSalary Team

1.2 Downgrade | 5061.201

Release 5061.201 will be published for the NAV / BC versions for which full updates are no longer available starting from 5062.000 but individual tasks are still provided.

This refers to:

- Dynamics 365 Business Central Spring' 19 – version 14 (C/AL)
- Dynamics 365 Business Central Fall' 18 – version 13 (C/AL)
- Dynamics NAV 2018
- Dynamics NAV 2017

In this manual, the task below is included in 5061.201:

Personnel

- **12788** Personnel bank | IBAN QR

1.3 Employee

1.3.1 Employee card | Work Permit

Task #12814 | 5063.001

The displayed Work Permit names were not displayed correctly when selected. This trouble has been fixed and the familiar names for individual Work Permit are displayed again.

1.3.2 Employee card | Employment %

Task #12758 | 5063.001

Maximum number of Employment 100% can be stored in the Employee card.
The same is checked now if Employment % are changed for the past or future via the TimeMachine field.

1.3.3 Employee bank | QR IBAN

Task #12788 | 5063.001 [5061.201]

A message about the lack of SIC participation of the derived clearing number was displayed when entering an IBAN QR.
There are now several options for SIC participation. They have been added now and, therefore, no message is displayed anymore.

1.4 Reports

1.4.1 Salary certificate | Bar code

Task #12805 | 5063.001

Due to an adjustment introduced by Microsoft, the bar code on the Salary certificate no longer appeared for people with umlauts or special characters in their first or last names. We were able to fix this trouble and the bar code is displayed correctly again.

1.4.2 Account reconciliation | Output to Exel

Task #12797 | 5063.001

The output to Excel no longer worked due to an adjustment. This trouble has been fixed..

1.4.3 Mail Merge | Direct registration code

Task #12544 | 5063.001

The registration code for SwissSalaryDirect can now be selected in document templates for creating Mail Merge.

1.5 Salary declaration

1.5.1 Statistics | Hourly wage hours

Task #12750 | 5063.001

When transmitting the statistics, working hours for hourly wage earners were exported based on the document date.

When processing was delayed with a document date in the previous month, this led to missing hours in the transmission. This was corrected.

Hours based on the settlement date are always taken into account for transmission.

1.6 Interfaces

1.6.1 SmartPort | Statistics Education

Task #12811 | 5063.001

The SmartPort has been added. The OptionValues in the Education field have been implemented. There is a new SmartPort schema for Hotfix 5063.001 in the Hotfix directory (on the SwissSalary Sharepoint).

1.7 KLE

1.7.1 KLE | Wage details Claims notification

Task #12779 | 5063.001

The wage details are displayed correctly again on the claim report.

1.8 SwissSalary Budget

1.8.1 SwissSalary Budget | Allocation Group

Task #12536 | 5063.001

In the list 'SwissSalary Budget pay run open' and 'SwissSalary Budget pay run posted', the column 'Allocation Group' is now displayed by default. It is now possible to filter by Allocation Group in this list.

1.9 SwissSalary EasyRapport

1.9.1 EasyRapport | Cross-client check Login

Task #12761 | 5063.001

If the employee login for EasyRapport is selected on the Employee card, there is no longer a check as to whether this is already being used in another client.

1.9.2 EasyRapport | Get EasyRapport Entry

Task #12815 | 5063.001

The 'Get EasyRapport Entry' function accessed all clients in the background, even if there was a client restriction. This has been fixed.

1.9.3 EasyRapport | Extension data transfer

Task #11857 | 5063.001

It has been implemented that the "Balanced" field (numbering of the time type field 'Balance Group') in the EmployeeInfo is sent to SwissSalary EasyRapport. In order to fully meet the requirements, SwissSalary EasyRapport now needs to make further adjustments. These can only be started once this adjustment has been published.

1.10 Technical Information

1.10.1 Event | Employee Dimensions Wage accounting

Task #12740 | 5063.001

The "SwS Process Payroll" report now has a new event:

PayrollLog: The current "SwS Payroll Log"

Employee: The current "SwS Employee"

PostedEmployeeDimension: "SwS Employee Dimension posted" filtered by Employee and PayrollLog.

1.10.2 Permissions | Indirect permission for Payroll Log Overview

Task #12762 | 5063.001

Users with only the SWS-PROCESS or SWS-POSTING role could not post pay processes in SaaS. This was fixed by indirect permissions in the object.
