# 1 QualityRelease 5066.003 | User

## 1.1 QualityRelease 5066.003 | Introduction

Dear SwissSalary customers,  
Dear SwissSalary partners,

This QualityRelease contains adjustments and corrections for customers who are already using at least SwissSalary version 5066.000.

For further information on the content of versions 5066.001 and 5066.002, please refer to the relevant manuals.

Customers are responsible for performing SwissSalary updates. Our support team or your Dynamics365 partner can assist you if necessary. This responsibility also lies with customers for SwissSalary365 (Cloud), and SwissSalary does not perform updates automatically.

Your SwissSalary team

---

## **1.2 Payroll**

### **1.2.1 TapBoard | Performance**

Task #7045 | 5066.003

The performance of the SwissSalary TapBoard has been optimized.

## **1.3 Administration**

### **1.3.1 System initialization | Social fund**

Task #9230 | 5066.003

When system initialization was exported from a client, any social fund was not previously exported in full and was therefore not initialized.

This has been corrected, and any existing social fund setup is now transferred during system initialization.

### **1.3.2 Social fund | Representation expenses GE**

Task #9331 | 5066.003

Specific regulations apply to the calculation of entertainment expenses for companies based in the canton of Geneva.

The calculation is complex and is currently set up in SwissSalary via the social fund domain using several lines (plus/minus calculation). An employee salary type (ST) is stored in the social fund, which automatically generates the calculated amounts. This salary type is configured in such a way that it should have a reducing effect on the bases for gross wages, AHV, ALV, etc.

During automated processing using the social fund, the social security bases were not reduced as desired. This has been corrected.

## **1.4 SwissSalary Budget**

### **1.4.1 Budget | multiple dimensions**

Task #9050 | 5066.003

When settling accounts in the budget, the 13th Payday and social security contributions for employees with multiple dimensions are now calculated for all dimensions.

## **1.5 SwissSalary EasyRapport**

### **1.5.1 EasyRapport | Debugging file task queue**

Task #8711 | 5066.003

---

The EasyRapport XML debugging file can now also be downloaded for EasyRapport transfer via the task queue.

## **1.6 Technical Information**

### **1.6.1 Roller Center | Update**

Task #8982 | 5066.003

When a payroll run was created, the tile "Payroll run open" only displayed the value 1 after the browser was refreshed. Now, the tiles are updated immediately when a payroll run is settled or canceled. It also updates the displays in the ELM, Employees, KLE, and Pay Raise process areas.

### **1.6.2 Copilot | Embed learn.swissalary.ch**

Task #8986 | 5066.003

Copilot Chat can now access the SwissSalary Learn page within Business Central. This enables a quick search function with links to the relevant SwissSalary documentation.
