1 QualityRelease 5067.003 | User

1.1 QualityRelease 5067.003 | Introduction

Dear SwissSalary Customers
Dear SwissSalary Partners

This Quality Release contains updates and fixes for customers who are already running at least SwissSalary version 5067.000.

For more information on the contents of versions 5067.001 and 5067.002, please refer to the corresponding manuals.

It is the customers' responsibility to perform the SwissSalary updates. Our support team or your Dynamics 365 partner can assist you if needed. This responsibility also applies to SwissSalary 365 (Cloud), and SwissSalary does not perform updates automatically.

Your SwissSalary Team

1.2 Pay Raise

1.2.1 Pay Raise | Pay Raise Journal

Task #10525 | 5067.003

The Salary code is displayed by default in the pay raise journals.

1.2.2 Pay Raise | Direct Upload

Task #8410 | 5067.003

With Direct Mail, you can initiate the mailing of pay raise letters using the "Validity Date" or "Serial Number" filters.

1.3 Payroll

1.3.1 Payroll | Error Message When Making a Payment After an Employee's Resignation

Task #12566 | 5067.003

For an employee not subject to withholding tax who is paid an hourly wage, an error message appeared when a payment was made after the employee's departure. This occurred only if the "Additional Income" field was checked. Additional income is relevant for the calculation only for employees subject to withholding tax. If the field is checked, it no longer triggers an error message for employees not subject to withholding tax.

1.3.2 Security Filter | Withholding Tax Adjustment

Task #12603 | 5067.003 [1.5067002.2007.0]

In SwissSalary Version 5067.000, changes were made to the security filters that caused errors for users with Allocation Group filters.

If a user with a Allocation Group filter ran a payroll cycle that included retroactive adjustments to withholding tax rates, the previous deductions were not credited. This error has been fixed.

1.4 Salary Declaration

1.4.1 Statistics Update | Workplace with Lessons

Task #10533 | 5067.000

Weekly hours and lessons are recorded in the "Work Location" settings. If only the "Lessons" column had been filled in for a work location, an error message would appear when the statistics were submitted. This has been fixed.

1.5 Interfaces

1.5.1 UKA 9.1 and 24.1 | Number of children

Task #12136 | 5067.003

The number of children was not included in the UKA interface file "Payroll Setup." This error has been fixed.

1.6 SwissSalary EasyRapport

1.6.1 EasyRapport | Time Information

Task #12135 | 5067.003

In EasyRapport, under "Get EasyRapport Entry" and "Transfer," time entries were sometimes processed incorrectly during certain workflows. This has been corrected so that hours and time values are retained correctly and 24-hour entries are no longer generated.

1.6.2 EasyRapport | Import Table

Task #11965 | 5067.003

If an entry with an amount from the EasyRapport import table was transferred to the reporting journal and a rate was specified for the corresponding salary type, the reporting entry was incorrectly deleted if no quantity was provided. This behavior has been corrected.

1.7 Technical Information

1.7.1 Tenant Registration | Check Payline Items

Task #12888 | 5067.003

When performing an on-premises to SaaS migration and the user performing the migration is not the first user in SwissSalary, no payroll entries are displayed. As a result, the 'SalaryEntry.IsEmpty()' check which we run before importing the system initialization data did not work correctly. This has been fixed, and the 'SalaryEntry.IsEmpty()' check now works correctly in this scenario as well.
