1 QualityRelease 5067.005 | User

1.1 QualityRelease 5067.005 | Introduction

Dear SwissSalary Customers
Dear SwissSalary Partners

This Quality Release contains updates and fixes for customers who are already running at least SwissSalary version 5067.000.

For more information on the contents of versions 5067.001, 5067.002, 5067.003, and 5067.004, please refer to the corresponding manuals.

It is the customers' responsibility to perform the SwissSalary updates. Our support team or your Dynamics 365 partner can assist you if needed. This responsibility also applies to SwissSalary365 (Cloud), and SwissSalary does not perform updates automatically.

Your SwissSalary Team

1.2 Pay Raise

1.2.1 Pay Raise | Users without access

Task #8484 | 5067.005

A correction has been made so that a user who is not listed in the SwissSalary user table cannot view data in the corresponding client. Similarly, a user who is not listed in the client cannot approve journals.

1.2.2 Pay Raise | List of Pay Raises

Task #13360 | 5067.005

The "Pay Raise List" report takes Allocation Group filters into account as intended.

1.3 Personal

1.3.1 Employee Dossier | Paycheck

Task #13267 | 5067.005

The Paycheck now includes the option to save it to the Employee Dossier. If a payroll run is canceled, any saved Paycheck report is removed from the file.

1.3.2 Foreign ZIP Code | Error Message

Task #11961 | 5067.005

Foreign ZIP codes can be managed and processed using TimeMachine without triggering an error message.

1.4 Payroll

1.4.1 TapBoard | Batch Entry

Task #13370 | 5067.005

The TapBoard previously had two "Batch Entry" features. One of them has been removed.

1.4.2 Security Filter | TapBoard Display Error

Task #13556 | 5067.005

For a user with a Allocation Group filter, the rows were not loaded in TapBoard. Additionally, an error message appeared when switching between personnel numbers. This issue has been resolved.

1.4.3 SecurityFilter | Post Payroll

Task #13138 | 5067.005

If a user posted the payroll run using a Allocation Group filter, this triggered an error message. This has been corrected.

1.5 Reports

1.5.1 Employee Payroll Account | Time Types

Task #10591 | 5067.005

If the "Employee Salary Statement A4Q" report was not run with the end date of December 31, 20xx, the time types were not correctly reported for the respective month. This has now been corrected.

1.5.2 SecurityFilter | Family Allowance Statement

Task #12882 | 5067.005

The Family Allowance Statement takes into account the filter for the Allocation Group stored for the user and displays only the employees who meet the filter criteria.

1.6 Interfaces

1.6.1 Financial Interface | Target System in the Allocation Group

Task #13781 | 5067.005

If a customer-specific financial accounting interface had been created and integrated into the dropdown menu for the "Target System" financial interface in the Allocation Group, the user's own interface was no longer visible. The setting itself was not lost; the selection option was simply no longer visible in the

dropdown menu. This validation error has been corrected, and the customer-specific values are once again available as options.

1.6.2 SmartPort | Working Group

Task #12455 | 5067.005

An employee's Working Group can now be imported or updated via SmartPort. The WorkingGroupCode field is available for this purpose in the SmartPort schema. Empty values are supported; if a workgroup code is invalid, a corresponding import error message is displayed.

1.7 SwissSalary EasyRapport

1.7.1 SecurityFilter | EasyRapport Transfer

Task #13362 | 5067.005

If a user ran the EasyRapport Transfer with a Allocatin Group filter, an error message was displayed for entries already present in the import table that had been modified by employees in the EasyRapport web view. This has been fixed, and the behavior is now identical to when a user runs the transfer without a Allocatin Group filter. The data record is overwritten with the new values.
